

General Information

Aims and Scope: The Journal of Food, Agriculture & Environment publishes peer-reviewed original research, critical reviews and short communications on food science and technology, agriculture, animal science, human nutrition or human health, with particular emphasis on interdisciplinary studies that explore the intersection of food, agriculture, and the environment. The journal also considers a limited number of relevant scholarly manuscripts addressing ethical or socioeconomic issues related to modern agricultural and environmental sciences. The journal offers advertisement space for special announcements.

Research on Food and Agriculture is progressively moving towards an interdisciplinary study of sustainable food production to meet the demand of growing human populations. However, as more countries industrialize, there is an increase in air and water pollution, soil contamination, as well as elevated levels of global warming and depletion of the ozone layer. This complex scenario challenges researchers to develop and test more appropriate technologies for sustainable agriculture. Research, for example, is being carried out to overcome problems of environmental stress, minimize the use of pesticides, slow post-harvest storage losses, and explore nutrition, animal science and human nutrition or human health, by using conventional and new technologies such as biotechnology, mutation-assisted breeding and molecular biology.

The Journal of Food, Agriculture and Environment (JFAE) is dedicated to meet the need for a new journal that can encompass this wide range of topics and interdisciplinary approaches. JFAE will publish (in print and on-line versions) peer-reviewed original research, protocols, critical reviews or short communications in food science and technology, and agriculture or environment, with particular emphasis on interdisciplinary studies on food, human nutrition, agricultural and animal science or/and environment. For advice or more information, please contact the editorial Office.

JFAE: You are cordially invited to contribute to this scientific Journal of Food, Agriculture & Environment (JFAE) manuscripts on original research work or critical reviews in food science, human nutrition, agriculture or environment. The journal also considers manuscripts on biotechnology, ethical and socioeconomic issues related to modern agricultural and environmental sciences. This journal accepts summary of meetings, thesis, scientific reports, ongoing projects, job offers, advertisements or announcements. If you have any comments and feedback towards the successful development of this journal, please do not hesitate to let us know. Your input will be highly welcome and appreciated.

ISFAE: The scientific society ISFAE invites heads of institutions, heads of departments or decision makers to organize scientific meetings, seminars or exhibitions. ISFAE will disseminate the information, invites participants, guides organizers and contributors, and take charge of resulting publication. For more details email to: isfae@isfae.org
